MLG ROVER Ω · adesivos das peças

Imprima em tamanho real (100%, sem "ajustar à página"). A régua ao lado tem que medir 5 cm.

Recorte cada quadrado na linha tracejada (deixe a borda branca) e cole com cola bastão na peça que tem o mesmo código. Pode ser em qualquer lado, de preferência no lado de dentro. Não dobre e não deixe molhar.

No app do Quest, olhe para a peça a uns 30 cm. As menores (9 mm) precisam chegar mais perto.

0 · · · · · 5 cm
